

Risk Workshop for Toxicologists and Risk Assessors, Vancouver, November 5-8, 2019

Understanding risk assessment is one thing. Communicating about risk is another.

The Society of Toxicology of Canada (STC) is partnering with [experts](#) for an interactive, hands-on workshop that will boost your skills in both areas.

Gain a deeper understanding of risk assessment methods. Maximize the value of toxicology studies in characterizing risk. Encourage the use of sound science in risk-based decision-making. Apply practical tools for communicating your results to non-technical stakeholders.

To register [click here](#).

Highlights:

2 FULL DAYS OF RISK ASSESSMENT (View [agenda](#)):

- Applying best practices in human health risk assessment
- Using diverse data and cutting-edge methods
- Deriving health-based exposure limits with confidence
- Integrating risk science and policy for risk management decisions

2 FULL DAYS OF RISK COMMUNICATION (View [agenda](#)):

- Making the science make sense
- Understanding risk perception
- Using risk communication planning tools
- Engaging in meaningful dialogue with stakeholders
